

Yogesh Jain

Gurugram, Haryana | +91-7404638769 | itsyogeshjain3110@gmail.com | linkedin.com/in/yogeshjain3110

PROFILE

Software Engineer with 3 years of experience building scalable web applications, system integrations, and robust ETL solutions. Strong background in backend engineering and AWS. Adept at optimizing performance and leading technical onboarding initiatives.

EDUCATION

Guru Gobind Singh Indraprastha University

Bachelor of Computer Applications; CGPA: 8.33

Delhi, India

2018 – 2021

EXPERIENCE

Thoughts2binary Consulting & Solutions

Software Engineer – Backend/API Development

Gurugram, India

Oct 2022 – Present

- Built and deployed REST APIs and serverless Lambda functions for scalable internal products.
- Developed Shopify integration app with real-time inventory sync and OAuth integration.
- Reduced legacy system CPU usage from 85% to 30% through data processing optimization, which also decreased database size, allowing migration from XLarge to Large instance.
- Deployed event-driven AWS workflows handling 100K+ records/day using Lambda and SQS.
- Led new engineer onboarding, improving ramp-up time and documentation quality.

Coding Ninjas (Remote)

Teaching Assistant – Python & Data Structures

May 2022 – Sep 2022

- Resolved 200+ student queries related to Python and data structures.
- Reviewed 150+ code submissions, mentored learners in debugging and logic building.

KEY PROJECTS

Granite Connector (iPaaS) | Python, AWS Lambda, DynamoDB, Redis, Postgres

- Contributed to building a no-code ETL/workflow automation platform enabling integrations via authenticated APIs.
- Implemented OAuth-based SSO for LinkedIn, Google, Microsoft, and Facebook, improving security and ease of access.
- Delivered reusable workflow modules and trained internal teams on configuration and deployment.

Gateway 12 | Python, Django, AWS Lambda, Postgres, Redis

- Application for a Giant e-commerce platform to integrate 10+ POS systems like Shopify, Lightspeed, QuickBooks, etc.
- Sync millions of records per day and provide a dashboard to the user to check the system status.

GraniteStack | Python, Django, AWS, Postgres, Redis

- AI-powered low-code SaaS platform for deploying dedicated apps.
- Integrated ChatGPT-based table suggestions and optimized API performance.

TECHNICAL SKILLS

Languages/Frameworks: Python, SQL, Django REST Framework, Microservices, Data Structures

Cloud/Databases: AWS (Lambda, S3, EC2, API Gateway, DynamoDB, SQS, SNS, RDS), Redis, Postgres

Tools: Docker, Git, Linux, CI/CD Pipelines

Other: Query Optimization, Elasticsearch, API Design, RESTful APIs, Unit Testing, Agile Methodologies, GraphQL APIs

Certifications: Python, DSA in Python (Coding Ninjas – 05/2022)

ACHIEVEMENTS

Budding Performer Award, Thoughts2binary (Sep 2024)
